...SPECIFICATION may be provided with a reference to associated static data  
as mentioned above.

The network **component** may have a first **interface** to receive the  
**accounting** -related data sets from the **individual** sub- **systems** and an  
additional second **interface** that enables an access to the **master**  
**data base**. Such an access may be performed to update the master data  
base. Updating the master...are transferred via the data sourcing  
component 44 into dedicated data bases. More specifically, the  
**accounting** -related data sets received via the first **interface** 44a are  
stored in an entry **data base** 46, whereas the **master** data received  
via the second interface 44b are stored in the master data base 32...
